

Fat Loss Booster.

Recommendations to kickstart fat loss again after a weight loss plateau.

Background

The Fat Loss Booster is a set of recommendations for those who have reached a weight loss plateau, followed the weight loss plateau guide and are still wanting that extra boost to help with progress. It is important to remember that normal healthy weight loss would be around 1-2 pounds per week but bear in mind it will not be possible to lose weight every week. This is due to physiology in the body and social factors such as eating out/trips away etc.

A plateau is when an individual has not seen results for more than 4 weeks despite eating consistently and moving their body. It is not recommended to weigh every week as this will provide inaccurate results. If weighing, once a month is sufficient and will give a clearer picture of overall results. Implementing the Fat Loss Booster principles for 3-5 days should be enough to kickstart the fat loss process again.

The Fat Loss Booster is not recommended for highly physically active clients who undertake high-intensity training or fitness classes.

The Fat Loss Booster focuses on 4 main areas:

- Breakfast - Swap breakfasts for low carb/high protein combination
- Vegetables - Include plenty of vegetables at lunch and dinner
- Snacks - Aim to have high protein snacks throughout the day
- Lunch and Dinner - Go for high protein/lower carb options

BREAKFAST

As above, swap breakfasts for low carbohydrate and high protein options.

For example, rather than having oats and muesli, opt for a protein-based breakfast, such as:

- Smoothie - with one frozen banana and a small handful of other fruit (berries, mango etc.), Greek yoghurt, choice of milk, protein powder (useful if using dairy free milk/yoghurt), add any other superfoods, just be mindful of portions.
- Eggs - omelette, poached eggs, scrambled eggs, with mushrooms, tomatoes, avocado or any veg essentially.
- Greek yoghurt - with berries or in a choc chia pudding.

Get creative - Try to make these combinations more interesting, just remove the carbohydrate component.

High Protein / *Low Carb Snacks*

- Smoothie
- 2 Eggs
- Greek Yoghurt (125G) with berries
- Egg muffins
- Apple slices with 1 tbsp peanut butter
- Small handful of nuts
- Celery sticks and cream cheese
- Chocolate chia-pudding
- Any type of meat/fish

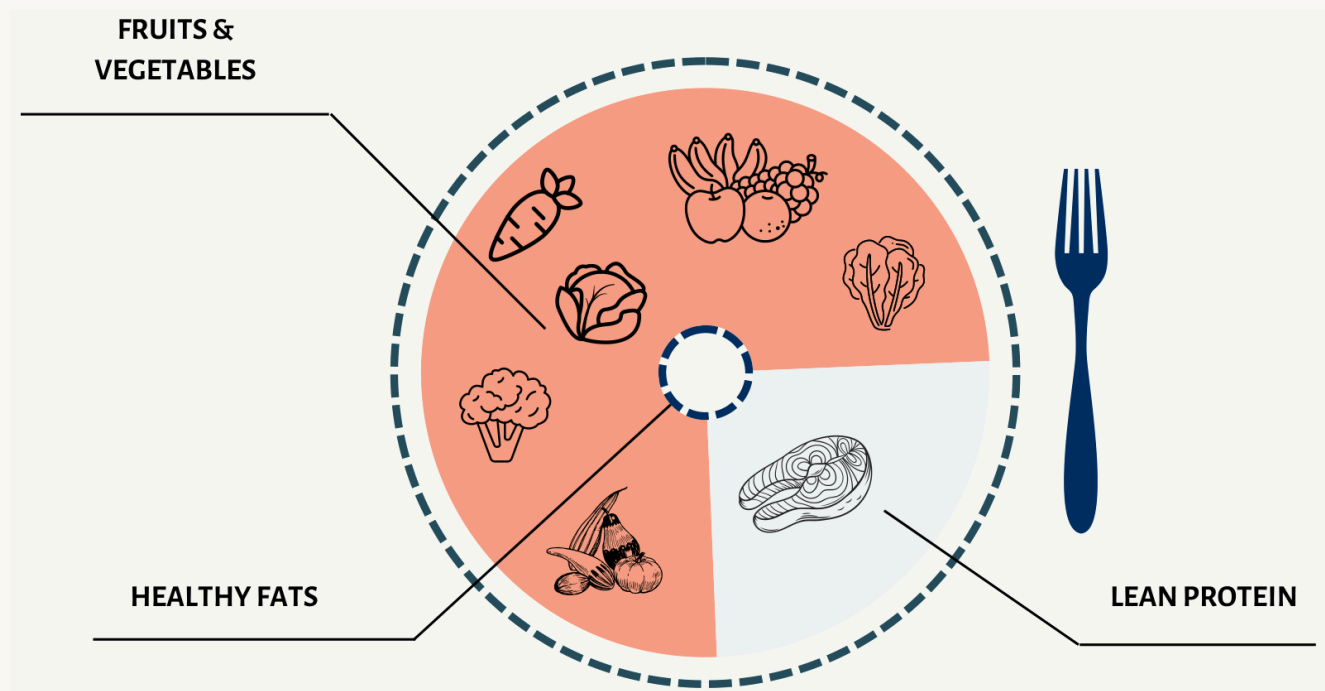

LUNCH AND DINNER

Instead of using the regular Nutrition Formula daily structure of low carbohydrate/high carbohydrate or medium/medium carbohydrate, the lunch and dinner meals should both be low carbohydrate and high protein. When both meals are low carbohydrate, however, it is important to note that this is not about restriction or having a small meal.

It is important to note that low carbohydrate does not mean no carbohydrate - rather reducing the amount of carbohydrates by reducing the portion of the additional carbohydrate element (pasta, regular potatoes, sweet potatoes, couscous, rice, grains, bread, wraps, pita bread, naan bread etc.). Carbohydrates will still be present in the fruits and vegetables in the meal.

This will look like the following:

How To Build A Low Carb Meal

- **STEP 1:** Fill 3/4 of your plate with vegetables and fruits
- **STEP 2:** Fill 1/4 of your plate with lean protein
- **STEP 3:** Add a small portion of healthy fats

The daily structure for fat loss booster:

	BREAKFAST	SNACK	LUNCH	SNACK	DINNER	SNACK (OPTIONAL)
Structure	Breakfast (high protein / low carb)	A portion of fruit / vegetables	High protein / lower carb lunch	Bigger snack (high protein low carb)	High protein / lower carb dinner	A portion of fruit / vegetables

An example of this daily structure for 5 days would be the following:

DAY	BREAKFAST	SNACK	LUNCH	SNACK	DINNER	SNACK (OPTIONAL)
1	Pina Colada Smoothie	Small handful of grapes	Pesto & Roasted Veg Omelette Wrap	Apple Slices With 1 TBSP Peanut Butter	Chicken Gyros & Tzatziki	1 pear
2	Berry & Peanut Butter Thickshake	1 orange	Vegetable Curry Soup	2 Boiled Eggs	Halloumi & Mediterranean Vegetable Medley	Small handful of blueberries
3	Green Smoothie Bowl	Small handful of blueberries	Green Shakshuka	Small Handful Of Nuts	Turkey Stuffed Peppers (Bell Peppers)	1 apple
4	Fruit Salad & Yoghurt	1 pear	Prawn Marie Rose Salad	1 Sliced Banana Topped With 1 TBSP Nut Butter	Greek Frittata	1 orange
5	Mango & Passionfruit Smoothie Bowl	1 apple	Cheats Tomato Soup	Celery Sticks & Cream Cheese	Salmon & Egg Bake	Small handful of grapes

** See fat loss booster meal guide for recipes*

An example of this daily structure for 5 days for a vegetarian would be the following:

DAY	BREAKFAST	SNACK	LUNCH	SNACK	DINNER	SNACK (OPTIONAL)
1	Pina Colada Smoothie	Small Handful Of Grapes	Pesto & Roasted Veg Omelette Wrap	2 Boiled Eggs	Vegetable Stuffed Peppers (Bell Peppers)	1 Pear
2	Berry & Peanut Butter Thickshake	1 Orange	Vegetable Curry Soup	Chocolate Chia-Pudding	Veggie Crustless Quiche	Small Handful Of Blueberries
3	Green Smoothie Bowl	Small Handful Of Blueberries	Mini Eggplant Pizzas and Salad	Small Handful Of Nuts	Feta & Egg Bake	1 Apple
4	Fruit Salad & Yoghurt	1 Pear	Quorn Marie Rose Salad	Apple Slices With 1 Tbsp Peanut Butter	Halloumi & Mediterranean Vegetable Medley	1 Orange
5	Mango & Passionfruit Smoothie Bowl	1 Apple	Cheats Tomato Soup	Celery Sticks & Cream Cheese	Greek Frittata	Small Handful Of Grapes

** See fat loss booster meal guide for recipes*

VEGETABLES

As outlined above, the meal structure for the fat loss booster should follow a low carbohydrate lunch and low carbohydrate dinner for 3-5 days. During this time it is even more important to include plenty of vegetables at lunch and dinner. The recommendation is to fill 3/4 of the plate with a variety of vegetables (and fruits) when balancing a low carbohydrate meal along with a portion of lean protein.

Remember that legumes and beans will count towards the carbohydrate content of a meal so opt for protein sources such as lean meat, fish, yoghurt, eggs, protein powders, milk, cheese, tofu, and tempeh.

SNACKS

Aim to have high protein snacks during the day rather than high carbohydrate options.

Some examples of high protein snacks include:

- Smoothie
- 2 Eggs
- Greek Yoghurt (125G) with berries
- Egg muffins
- Apple slices with 1 tbsp peanut butter
- Small handful of nuts
- Celery sticks and cream cheese
- Chocolate chia-pudding
- Any type of meat/fish
