

Simplified Carb Swap *List.*

This guide is designed to help you easily customise your meals by swapping out carbohydrates and legumes.

Welcome to the *Simplified Carb Swap List*

This guide is designed to help you easily customise your meals by swapping out carbohydrates and legumes.

You can effortlessly adapt your meals to suit your chosen carbohydrate structure (i.e. LC/HC, MC/MC or HC/LC) by removing, reducing or adding a carbohydrate element using the quantities outlined in the table below.

For reference, a high carb meal typically consists of about 1/4 of your plate filling with a carbohydrate element(s), while a medium carb meal includes just a few tablespoons.

With flexible options and a variety of alternatives, you can create dishes that meet your taste preferences and dietary needs.

Enjoy experimenting with different combinations to make each meal delicious and satisfying!

NOTE: > means greater than

	MEDIUM CARB	HIGH CARB
Any Type Of Bean (Cannellini, Haricot, Soya, Kidney etc.)	3 tablespoons	> 3 tablespoons
